# survey of fire departments in selected southern illinois counties, 1968

This report was prepared by the Greater Egypt Regional Planning and Development Commission as part of an ongoing regional planning program in cooperation with the Coal Belt Fire Protective Association in order to provide information on Fire Departments in nine selected Southern Illinois Counties.

**franklin, gallatin, hamilton, jackson, jefferson, perry, saline, union, and williamson.**

ILLINOIS STATE LIBRARY

February 25, 1969

Chairmen and County Boards
Mayors and City Councils
Presidents and Village Boards
Chiefs and Fire Departments

Dear Sirs:

We are herewith transmitting to you the Survey of Fire Departments in Nine Selected Southern Illinois Counties. This report was prepared in an effort to bring into focus a major segment of the Regional community. The Fire Departments of the Region, through their efforts to provide the best possible fire protection to the Region as a whole, have an important role to play in the preparation and implementation of plans for the future of the Region.

The directory was prepared under the Regional Continuing Planning Projects P-196-204. It is our hope that this report will prove to be a useful tool for the communities' fire departments in maintaining and improving the standards of fire protection in the Region. It is also hoped that this report has helped to further cooperation among the region's communities in planning for the future.

Sincerely,

Dr. Allen Y. Baker
Chairman

Franklyn H. Moreno
Executive Director

# COAL BELT FIRE PROTECTIVE ASSOCIATION

Object: "To form ways and means of extending help to each and every city, town and village, in case of fire, rescue, or other emergencies that may arise. To encourage measures for the general improvement of the FIRE SERVICE. To bring about the adoption of the National Standard Hose coupling thread and such other improved methods and practices as shall appear from time to time to be necessary and practical to the betterment of conditions and furtherance of the end in view. To foster and encourage the Illinois Firemen's Association in order that they may secure needed legislation for the benefit of the firemen of Illinois. To encourage and cooperate with the State Fire Marshal's Department." (Statement approved by Executive Board August 4, 1966)

Organized originally as a three county association (Franklin, Jackson and Williamson), the Coal Belt Fire Protective Association has grown to include departments from the nine counties of Franklin, Gallatin, Hamilton, Jackson, Jefferson, Perry, Saline, Union, and Williamson Counties. Through the Association, the member departments have formed an informal mutual aid pact through which member departments make available to other departments without charge, manpower and equipment when needed for emergency use.

From the original tri-county organizational meeting attended by 52 representatives from ten area departments in October, 1949, the Association's membership has swelled to include 41 departments. A mutual aid radio frequency has been designated (154.07 m.c.) for use by member departments to enhance emergency communications between departments. In addition, a low-cost life insurance program has been set up for firemen in the Coal Belt Region under the auspices of the organization.

## ACKNOWLEDGMENTS

The Greater Egypt Regional Planning and Development Commission would like to acknowledge the following agencies for financial assistance in this Regional Program.

Chairman and County Board of Franklin County
Chairman and County Board of Jackson County
Chairman and County Board of Jefferson County
Chairman and County Board of Perry County
Chairman and County Board of Williamson County

The Franklin County Housing Authority
The Jackson County Housing Authority
The Jefferson County Housing Authority
The Perry County Housing Authority
The Williamson County Housing Authority

In addition, the Regional Commission would like to acknowledge the following for cooperation and assistance in the completion of this report.

Coal Belt Fire Protective Association
Egyptian Fire Fighters Association
Illinois Firemen's Association
Illinois State Fire Marshall
The Firechiefs and Firemen of each Fire Department

And in particular, those persons too numerous to mention who contributed their time and knowledge without whose help this report could not have been prepared.

Section I

## INTRODUCTION

This report has been prepared to meet a common need for a centralized listing of data on fire departments in nine counties in southern Illinois. The Coal Belt Fire Protective Association, covering nine counties, desired a listing of equipment and data pertaining to fire departments to assist their Mutual Aid Program. The Greater Egypt Regional Planning and Development Commission, serving five of the nine counties served by the Coal Belt Association, required data on fire departments for its community, county and regional planning programs along with its regional Economic Development District program.

In September, 1968, representatives of the two organizations met and agreed to cooperate in the preparation of this report. It was agreed that the Greater Egypt Regional Planning and Development Commission would conduct a survey of the area departments and prepare a directory of the departments and pertinent data relating to the fire departments. The Coal Belt Association would provide the technical assistance needed for the preparation of the report along with endorsing the survey.

The report that has been prepared is intended to make available to interested parties heretofore uncollected data. It is not intended to be a plan for fire departments or to recommend policies or actions. It is viewed solely as a source of base data on fire departments in nine selected counties of southern Illinois.

## Section III

## SURVEY METHODOLOGY

In order to gather information on fire protection in as comprehensive a manner as possible, a survey form was developed by the Coal Belt Association members and the Greater Egypt Regional Planning and Development Commission staff. This survey evolved through several stages of refinement and expansion before the final form was agreed upon. (See Appendix.)

There were four broad categories dealt with by the survey: Manpower, Equipment, Finances, and the Illinois Inspection and Rating Bureau reports. Under Manpower, questions were asked to ascertain the number of men available, their rank, their training, and their status (volunteer, call men, full-time). Questions dealing with equipment concentrated on major pieces of equipment available, rescue and emergency equipment available, equipment age, and hose and hydrant thread types.

Questions asked relating to finances were concerned with annual budget, sources and amount of income, annual expenditures, and annual fire loss.

The Illinois Inspection and Rating Bureau is a private firm which inspects cities and fire departments in Illinois with the purpose of classifying areas for fire insurance rating purposes. Each department was asked to enclose a copy of their most recent inspection report. In addition, questions were asked pertaining to recent compliance with the report's recommendations, and plans for future compliance with the report's recommendations.

The Inspection Bureau's reports provide an excellent means by which comparisons may be made between departments. These reports, prepared by impartial experts, provide unbiased observations of the quality and extent of fire protection available.

From a community, county, and regional planning viewpoint, these reports provide an invaluable tool in recommending to local governments plans for capital improvements of fire departments as well as improvements in related areas such as water source, storage, and distribution systems.

A copy of the survey was mailed to each department Chief on October 15, 1968. Approximately one month later, a letter of reminder was sent to each department that had not returned a survey form. In addition, another letter was sent to departments who had returned a survey form, but who had inadequately completed the rescue and emergency equipment section. Enclosed with this letter was a one page form asking the chief to indicate particular items of rescue/emergency equipment his department has on hand.

In December, 1968, telephone calls were made to those departments who had not returned the survey. Finally, post cards were mailed in mid-January to those few departments remaining. Eventually, a 75% return (39 departments out of 54 surveyed) from the nine counties surveyed was gained. These included all major departments. (An 85% return (33 departments out of 39 surveyed) was evidenced by the five-county Greater Egypt Region, six of the smaller volunteer departments did not respond.) From this response, it was then possible to form a valid base of data on fire departments in the nine counties.

## Section IV

## SURVEY ANALYSIS

### Manpower

Department manpower ranges in number from 8 to 43. The average number of men available to the departments is 19 for the 36 departments responding to the question. These 36 departments listed a total of 695 men.

Almost all departments indicated training programs are used. All use departmental training by the individual departments and many indicated they take advantage of training available annually from the University of Illinois. In addition to this, supplemental training in first-aid and fire fighting is available at irregular intervals within the nine-county area.

Of the 40 departments responding to the question, 24 indicated they were completely volunteer, 13 indicated they were a combination volunteer and paid department, and only 3 indicated they had all paid firemen. Of the volunteer departments, about one-third paid the volunteers by the call with the other 2/3 receiving no pay. A few of these pay different amounts for different types of calls, but most paid a flat three to five dollars per call.

### Equipment

There are four aerial ladder trucks in the nine-county area, 55 feet, 63 feet, 65 feet and 85 feet. In addition, there is a 75-foot aerial snorkel truck located at Mt. Vernon. Due to the lack of multi-story buildings in most towns in the area, these pieces of aerial equipment are generally sufficient to cover the area needs for aerial trucks through the Coal Belt Fire Protective Association's mutual aid pact. However, as the population of the region grows, additional aerial trucks will no doubt be needed.

Pumper trucks are available from every department with all but fourteen of the smaller departments having two or more. However, many of these trucks are outdated, having been in use 12 years or longer.

A comprehensive emergency and rescue equipment inventory is not maintained by every department. Many do not have air breathing equipment on hand and few have other items such as rescue saws and generators and lighting equipment. This equipment, as with aerial trucks, is available to many only through the Coal Belt Mutual Aid Pact.

Twenty-five departments utilize radio communications with eleven of these departments utilizing the Coal Belt Mutual Aid frequency of 154.07 m.c.

While hose thread types vary somewhat, 28 of the 40 departments responding have adopted the National Standard Coupling Type, and most departments have universal hose couplers. (For a detailed listing of equipment, see the fold-out chart.)

## Finances

For purposes of comparison between departments, the 1967 Budget for each department (where available) is included on the fold-out chart. Generally speaking, most departments operate on an appropriation from the local taxing body's general fund, with relatively few municipalities exercising their option to levy a separate tax for fire protection.

## Illinois Inspection Bureau

Response to the section of the survey related to the Illinois Inspection Bureau's rating reports was quite low. According to comments received, Reports were unavailable to the respondents at the time of the survey due to either the period of elapsed time since the last inspection or to changes in city or department record keeping personnel resulting in misplaced or discarded reports. Due to the low level of response, results from the inspection reports have not been included in this report.

## Section V

## CONCLUSIONS AND RECOMMENDATIONS FOR FUTURE REPORTS

The form itself was lengthy and time-consuming to fill out. Some of the questions were not pertinent to the area's fire departments while other questions did not yield as comprehensive an answer as was desired.

The form should be redesigned before its use again. The data requested should follow a more logical order with the questions keyed to a standard card punch data processing system. This would allow a more detailed analysis along with simplifying the departments' task of completing the form.

In particular, the section dealing with specialized emergency and rescue equipment needs to be presented in much more detail. Due to the general nature of the question, most departments responded in a general way instead of the expected in-depth answers.

Since this report offers base information on area fire departments, it is recommended that a procedure be set up to continue the collection of fire protection data. The survey should be conducted either annually or bi-annually to keep the data current. It is suggested that a method of mutual funding by interested parties be arranged to insure the preparation of such future reports.

Due to the obvious aid the Illinois Inspection Bureau's Reports are to cities, departments, and the regional commission in terms of planning, it is also recommended that the GERP&DC attempt to obtain copies of the reports for every department they have not received a report for. A spokesman for the Bureau has suggested that, since the Bureau policy is to release these reports only to its contracting insurance companies or to the departments and towns, the GERP&DC should request the individual department chiefs and village president or city mayor

to request that copies of the Bureau's reports be forwarded to the GERP&DC office. It is expected that the GERP&DC should provide a form letter to the chiefs and towns for this purpose.

Upon receipts of these reports, a separate regional report based on the Inspection Bureau's reports and steps taken by the cities, towns, and departments to meet the reports recommendations should then be issued by the Greater Egypt offices.

# Coal Belt Fire Protective Association

## Of Southern Illinois

October 15, 1968

Dear Chief:

The Coal Belt Fire Protective Association at the October 3, 1968 meeting in McLeansboro endorsed a comprehensive fire protection survey to be conducted by the Greater Egypt Regional Planning and Development Commission. The GERP&DC will conduct the survey of all Fire Departments within the counties served by the Coal Belt Association and the GERP&DC. The information obtained through the enclosed questionnaire will be used to compile a directory of information, a copy of which will be provided each department at no cost to the Association or the departments.

We feel the directory will be useful to the individual fire departments and to the Coal Belt Association in that it will provide a comprehensive listing of equipment, manpower, and facilities available throughout the area served. The information will also be used by the GERP&DC in their community and regional planning programs and in their economic development programs. It is planned that this directory will be updated annually.

I urge you to give the GERP&DC your fullest cooperation by completing and returning the survey at your earliest convenience. Thank you.

Sincerely,

Dean Mercer, President
Coal Belt Fire Protective Association

# INSTRUCTIONS FOR FILLING OUT FIRE PROTECTION QUESTIONNAIRE

The attached questionnaire has been developed with the advice and recommendations of the Officers and Executive Board of the Coal Belt Fire Protection.

You should find the questionnaire not as big a task as it may first appear. In most cases a check mark or a number will provide the information needed.

There are three areas of questions which are especially significant, deserving your special attention.

1. Item 10d. Be as specific as possible; particularly, the listing of specialized equipment for emergency or rescue situations. (In an emergency this information could be extremely inportant.)

2. Illinois Inspection Bureau Report. There are two ways you can make the latest report available:

   (a) If you have access to a photocopy machine, please send us a copy.

   (b) You may send us the original and we will make a copy and return the original to you.

3. Fiscal Year/Calendar Year Data. Be sure and indicate whether you refer to fiscal year or calendar year in those questions where the year is relevant. Also, if fiscal year, please indicate the dates for fiscal year.

Feel free to add items of information that you feel will be helpful . . . Your comments and recommendations for improving the questionnaire are invited.

If you have any question pertaining to information requested, contact:

James Rush
Greater Egypt Regional Planning and Development Commission
211½ W. Main Street
Carbondale, Illinois 62901
Phone: 618-549-3306

Thank you for your help.

# NEWS RELEASE

Greater Egypt Regional Planning and Development Commission
211½ W. Main St.
Carbondale, Illinois
Telephone: 549-3306
October 15, 1968

FOR IMMEDIATE RELEASE

Dean Mercer, President of the Coal Belt Fire Protective Association has announced the mailing of a survey being conducted of community and area fire departments in a nine-county area of Southern Illinois from which the Association draws its membership. The survey forms, developed in cooperation with the Greater Egypt Regional Planning and Development Commission, were mailed October 15 to 58 fire departments in Franklin, Gallatin, Hamilton, Jackson, Jefferson, Perry, Saline, Union and Williamson Counties.

Responses provided by local fire chiefs will be produced in the form of a directory, consisting of a listing of comprehensive information relative to each community's fire protection. Items included pertain to equipment, personnel and facilities.

Mr. Mercer stated that while most of the departments are pretty familiar with most such information, he is hopeful that a thorough awareness of some items of special emergency and rescue equipment will be especially valuable to have. He said that it will be useful also in meeting requests received from outside firms interested in the availability of fire protection in the area.

Greater Egypt hopes to put the information to use in a variety of ways, including data needed for its area central data system and in its planning functions.

The Coal Belt Fire Association, which was formed by area fire departments to provide mutual aid, maintains its own communication network among area departments. The mutual aid for fire fighting was cited by Greater Egypt as an example of cooperation among communities to provide services beneficial to the entire Region.

# Coal Belt Fire Protective Association

## Of Southern Illinois

November 18, 1968

Dear Chief:

On October 15, 1968 you were mailed a fire protection survey to complete and return.

On the survey form you returned, we noticed you neglected to complete the section dealing with emergency and rescue equipment.

One of the major benefits of the survey will be a listing of this equipment, so that a department without a particular piece can quickly locate it.

I want to thank you for taking the time to help out on the survey and encourage you to help us make it as useful as possible by completing the attached sheet.

Sincerely,

Dean Mercer, President
Coal Belt Fire Protective Association

# Coal Belt Fire Protective Association

## Of Southern Illinois

November 18, 1968

Dear Chief:

On October 15, the Greater Egypt Regional Planning Commission mailed you a fire protection survey form to complete and return.

This survey is being sponsored by the Coal Belt Fire Protective Association and will be used to compile a directory of fire protection for the region.

Your participation in this survey, while completely voluntary on your part, is encouraged. A copy of the directory will be distributed free of charge to all participating departments. The Coal Belt Association feels that this information, particularly the data dealing with emergency and rescue equipment, may prove to be a valuable asset in emergency situations. The GERP&DC will also utilize the information in its community and regional planning and economic development programs.

Because of the importance that the Coal Belt Association attaches to this information, I urge every Chief who has not done so, to complete and return this form as soon as possible.

If you have any questions, you may contact either myself or Mr. James Rush, 211 ½ West Main St., Carbondale, Illinois 62901.

Sincerely,

Dean Mercer, President
Coal Belt Fire Protective
Association

1-14-69

Dear Chief:

As you know, the Greater Egypt Regional Planning and Development Commission is preparing a directory of fire departments in a five county area in cooperation with the Coal Belt Fire Protective Association.

To date your department has not returned a questionnaire. To be included in the directory, the questionnaire should be in our office no later than Monday, January 20, 1969. Your cooperation will be appreciated.

James R. Rush
Greater Egypt Regional Planning and Development Commission
211½ W. Main

# NEWS RELEASE

Greater Egypt Regional Planning and Development Commission
211 1/2 West Main Street
Carbondale, Illinois 62901
Telephone: 549-3306
March 5, 1969

FOR IMMEDIATE RELEASE

Chester Steele, President of the Coal Belt Fire Protective Association has announced the completion of a survey conducted of communities and area fire departments in a nine-county area of Southern Illinois from which the Association draws its membership. The survey, conducted by mail with the aid of the Greater Egypt Regional Planning and Development Commission was begun late last year in Franklin, Gallatin, Hamilton, Jackson, Jefferson, Perry, Saline, Union and Williamson Counties.

Information provided by local fire chiefs has been collected in a report issued by the GERP&DC offices this week which will be distributed throughout the region to fire departments, communities, civil defense offices, and other officials. The directory is a comprehensive listing of information relative to each communities' fire protection. Items included pertain to equipment, manpower, and facilities.

Steele, Chief of the Murphysboro Fire Department,stated that the information would be useful to departments by providing at a glance various department's special emergency and rescue equipment. In addition, the directory will be a valuable tool in meeting requests from outside firms interested in the area's fire protection resources.

Franklyn Moreno, Executive Director of GERP&DC, stated that the directory, which would be updated regularly, would be useful to the Commission in a number of ways including community, county, and regional planning programs, the Economic Development District Program, and its regional central data system. Moreno cited the Coal Belt Association's Mutual Aid program as an outstanding example of community cooperation to provide services beneficial to the entire region.
